Project Name: Bank Management System in c program.

DESCRIPTION: As the name suggests this project is based on the bank system where you can perform operations like opening a bank account, managing transactions like debiting and crediting money. For opening a bank account you need to add name, Id, date of birth, account number, age, address, citizenship, phone number. In this project, you can also check the list of existing customers and also can remove an account with the help of inbuilt operations. This project will give you a realistic feel of the bank where you can perform activities which are done in the real banks.

FUNCTIONALITIES :

- Login-(You need to login your bank account using password)
- Create new account
- Update information of existing account
- For transactions- (Transfer money in another account)
- Check the details of existing account
- Removing existing account
- View customer's list
- Exit

Conclusion: Our project is only a humble venture to satisfy the needs in an Institution. Several user friendly coding have also adopted. The main focus of this project is to easier way of banking.
